

Energy-meters three-phase - BASIC

digital active energy-meter

2 tariffs - 2 SO

- Direct connection 80 A
- Connection through CT .../5 A till 10.000/5 A

Application

The energy-meters "LCD screen for perfect reading" are used to measure three-phase systems like in Residential, Utility and Industrial applications.

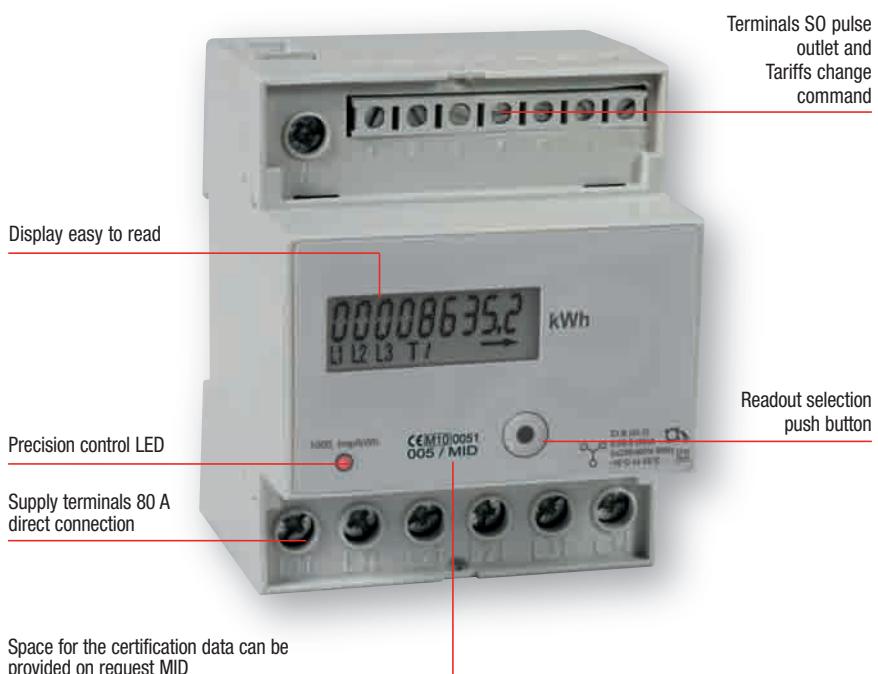

Function

Display

Energy-meters three-phase - BASIC

digital active energy-meter

2 tariffs - 2 SO

- ▶ Direct connection 80 A
- ▶ Connection through CT .../5 A till 10.000/5 A

Overview

Active energy-meters for three-phase alternating current with either 2, 9 digits digital counters. These meters have 1 SO output generating pulses for remote processing of the instantaneous energy active measurements for 2 tariff.

- For direct connection 80 A, or for transformer .../5 A
- For transformer primary current of 5 A to 10.000/5 A. Input is in 5 A increments
- 9 digits - 4 display for energy values indication
- Detection of connection errors (phase transposition and phase missing)
- Accuracy class 1 for active energy according to EN 50470-3 (**B**)
- Most attractive operating range current (*Ist* ... *Imax*)
for direct connection 80 A = 0.015 ... 80 A
for connection by CT .../5 A = 0.003 ... 5 A
- Energy register zero setting (**NO MID**)
- Energy register for import and export
- Sealable terminal covers only for MID version
- 4 DIN modules wide (72 mm)

Technical data

Data in compliance with EN 50470-1, EN 50470-3 and EN 62053-31

General characteristics

	DIN 43880 EN 60715	DIN 35 mm mm	ECSEM70-ECSEM74MID direct connection 80 A	ECSEM62-ECSEM66MID CT connection till 10.000/5 A
